

Brose Quality and Continuous Improvement

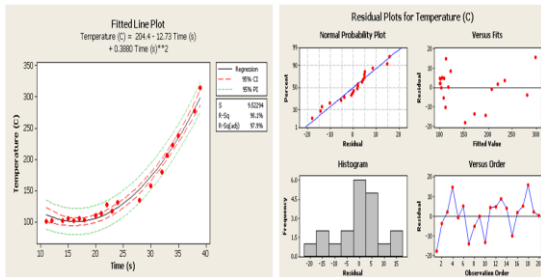

Client:

Brose is an automotive supplier specialising in mechatronic components and systems for vehicle doors, seats and body at 58 locations in 23 countries worldwide. Brose's customers include more than 80 car manufacturers and other automotive suppliers.

Requirements:

Deliver an In-house Six Sigma Green Belt programme to enhance and further develop Problem Solving capability.

Develop and deliver a bespoke programme to build competence and confidence in using Correlation and Regression analysis to support Quality Improvement activities.

Capella Input:

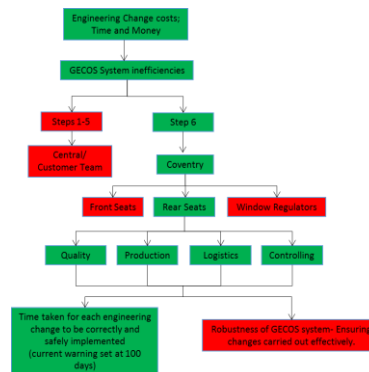

Management awareness and engagement workshops

Provision of template resources for programme set-up including Programme Risk Assessment and Standard Agenda for Steering Group

Keynote speech at the Brose Quality Awareness week

Delivery of classroom training to groups of key people

1:1 and group coaching to drive the application of learning through projects selected by Brose and scoped with Capella support

Results:

Steering Group established and best-practice shared with other Brose sites

Projects completed in key areas across the business, delivering bottom-line savings and significant improvements in KPIs

Inhouse awareness training developed and delivered by Brose Black Belts

Plans developed for further improvements

“ I thought that it was excellent...the examples were very clear and I liked the fact that they were real world cases.

Phil Fiddean

Capella provided great materials and support to help me. I would definitely recommend them to anyone who is considering this programme – the trainer was extremely knowledgeable and helped you realise your potential on your own.

Lauren Thornborrow
