

Sertec 5S Programme

Client:

Sertec are experts in a range of steel and aluminium manipulation and assembly processes. These include transfer and progression presswork, tube manipulation, wire forming, deep drawing, welded and self piercing riveted components.

Requirements:

Deliver a bespoke 5S training programme to in-house Champions in order to drive 5S and best practice throughout all Sertec plants, world-wide.

- Create Group standard for housekeeping disciplines
- Reduce risks and issues, Quality, HSE, contamination
- Train Champions and Plant Managers to support standard group process
- Promote good 5s disciplines and housekeeping standards across all areas within Sertec Group companies
- Develop program for Plant Managers to support audit process and share lessons learnt across Sertec Group.
- Support Plant Managers improve their overall site controls and disciplines and develop their teams.

Capella Input:

Developed and delivered a bespoke 5S training package to meet Sertec requirements

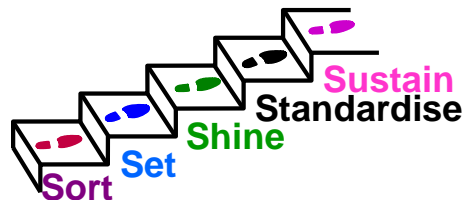

Built underpinning knowledge of 5S plus key supporting tools to drive robust root cause identification

Encouraged the use of structured problem solving to ensure identified 5S issues are addressed and sustained effectively

Facilitated workshops to share learning and best practice

Developed a Train-the-trainer package to enable Champions to deliver 5S awareness training internally

Provided updates to Sertec's Training Manager and Quality Director

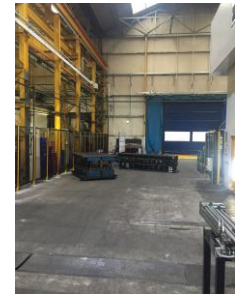

Results:

Over 30 Champions trained and coached

Resolution of over 50 5S issues and a further 100 issues pending sign-off

A new, simple approach to 5S through 5 photos of 5 issues, laying the foundations for a 5S culture at all sites

“ I left the training and found myself looking at my area through new eyes ”
