

# Pattonair Six Sigma Programme

## Company Information

Pattonair is a logistics and supply chain facilitator for major aerospace organisations, including Airbus and Rolls Royce and the Ministry of Defence.

## Requirements

- Build capability across the organisation in terms of Problem Solving and Process Improvement, certifying key people to Six Sigma Green Belt level
- Establish a common language for Quality and Continuous Improvement within Pattonair
- Deliver bottom-line benefits and process improvements through the completion of projects.

## Capella's Input

26 days of onsite Six Sigma support across 2 training waves, including:

- Six Sigma Training
- Support for project scoping
- Technical support in key tools such as Measurement Analysis, Graphical Analysis and Root Cause Verification
- Support and advice on strategic deployment

“ Thanks to Capella for all the support and guidance they have provided through-out this programme. It has been a great experience. ”

Sean Neale, Pattonair

## Results

11 Certified Six Sigma Green Belts across 2 training waves.

Improvements in:

- Drawing extraction lead time
- Lost stock reduction
- Incorrect Documentation
- Source Change appointment scheduling
- Negative Margin on parts
