

Nasmyth-hosted Green Belt Programme - Wave 5 2018

Information

Capella delivered another highly successful Green Belt Wave for this Global Specialist Engineering company. In addition, companies from other sectors took part and this added variety and richness to the training environment with many shared-learning opportunities.

Requirements

- Deliver training and project support to a mixed group of delegates from Yellow up to Green Belt level.
- Train and demonstrate Lean and Six Sigma tools and techniques using a blend of learning resources including case studies, practical exercises and real-time projects to support underpinning knowledge.

“ The programme was very well structured, with clear deliverables and timings. Provided support documents (Tracker, DMAIC Presentation Template, Support Document Templates, Training Resource Folders) were invaluable throughout the programme. ”

Capella Input

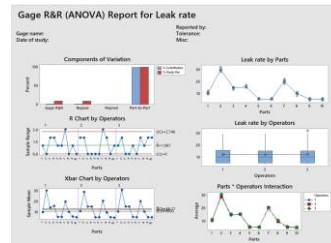

Provided tailored delivery of training in Lean and Six Sigma across Yellow and Green Belt tool sets.

Accommodated for the varied learning styles with on-request support to assist and guide delegates through the completion of their individual projects.

Guided support in the use of Minitab software.

Regular feedback to sponsors and programme leaders.

Presentation event to share and celebrate successes.

Results

Successful completion of the knowledge assessment for all delegates, demonstrating improved capability.

Completed improvement projects estimated to deliver c. £4.5m annual savings for the businesses.
